A word about the creator

Michel Gondry, the founder of the Home Movie Factory, is a French director whose talent is matched only by his creativity. His enigmatic and singular universe attracted great names in the music industry; the Rolling Stones, Daft Punk, Björk, Kylie Minogue and IAM have used the "Gondry" style in some of their video clips and elevated the ranks of the authentic work of art. Michel Gondry is also the distinguished director of feature films *Eternal Sunshine of the Spotless Mind*, *The Science of Sleep* and *Foam of the Daze*, among others.

The values of the Home Movie Factory

"With this project, I would like to allow everyone to design his own entertainment rather than consume it". This is the first inspiration of Michel Gondry in the creation of his Factory. His main mission is to create an interactive and free experience, in order to demystify the cinematographic production process, making it accessible to all.
